

# ARCTICO<sub>2</sub> MULTI

MULTICOMPRESSOR UNIT

## ARCTICO<sub>2</sub> MULTI

### SPECIFIC SOLUTION

#### Multicompressor unit with natural refrigerant CO<sub>2</sub>

Depending on the application, ARCTICO<sub>2</sub> MULTI is a standard or specific solution. They ensure energy-efficient cooling, superior quality control of products and raw materials, and energy savings.

With ARCTICO<sub>2</sub> Multicompressor units we provide a complete solution for cooling in industrial and commercial applications.

With **ARCTICO<sub>2</sub> Multicompressor** units we provide a complete solution for cooling in industrial and commercial applications using natural refrigerant. Depending on the application, we are able to produce custom made multicompressor units adapted to the project requirements.

In accordance with the environmental protection requirements, we have developed transcritical multicompressor units that are featured energy efficiency, operational safety, flexibility and a specific design.

For the needs of the application in supermarket chains, logistics and the food industry, we also provide CO<sub>2</sub> mini booster cooling units with 2 or 3 compressors and refrigeration capacity of up to 50 kW (MT and LT regimes), which are featured by reliability and very compact dimensions.

Our range also includes HFC alongside CO<sub>2</sub> multi-compressor refrigeration units.
